Charter for European Researchers and Code of Conduct for the Recruitment of Researchers

The University of Potsdam (UP) represented by its president, Professor Oliver Günther, Ph.D., expresses its strong support to the recommendations for recruitment of researchers of the European Commission.

The UP recognises the value of the recommended principles to increase its excellence in research and confirms having already implemented most of them.

The UP will take an active part in the further implementation of the best conditions for research and mobility on a European level.

The endorsement by UP is in line with its explicit policy to contribute to the attractiveness of a research career in the European Research Area and developing excellent conditions for researchers at its own institution.

Professor Oliver Günther, Ph.D.
