1.7 Gross annual earnings and hourly earnings of non-academic researchers (2006, in PPP €)
1.8 Salary data of university researchers by country – A literature survey

Brussels, October 2012
1 RESEARCHER REMUNERATION IN ACADEMIA

1.0 Introduction

This is one of a series of more than 40 country profiles summarising data on the remuneration of researchers and work-related benefits in the academic sector. Data were collected for the European Commission in 2012 by an extensive network of national experts as part of the MORE 2 study. The profiles provide also complementary data from official sources.\footnote{Data have been collected in 2012. If there are more recent data available, they have not been included in the country profiles but the respective sources are listed in chapter 7 of the MORE2 WP4 report (IDEA et al. 2013).}

A report containing a comparative analysis of the data and more qualitative information related to the remuneration of researchers will also be published as part of the MORE2 study.

The profiles are structured as follows:

1. Main indicators
2. Salaries, stipends and benefits by job position and employment contract
3. Tax system
4. Labour legislation in the Higher Education Sector
5. Social security system
6. Quality of life
7. Where available: Gross annual earnings and hourly earnings of non-academic researchers
8. Where available: Salary data of university researchers by country – A literature survey

In the first section, the main indicators on remuneration (salaries, stipends, and the degree of autonomy of universities to decide on remuneration-related aspects) are compared with the EU-average and the US. In the second section, the profiles summarise minimum, average and maximum annual gross salaries (both in national currency and in purchasing power parities) for all available job positions and employment statuses.

The following sections present an assessment of the value of the gross annual salaries. As it is very difficult to collect data on net salaries that are meaningfully comparable across countries due to very specific regulations, the country profiles include information on the dues that are typically deducted from gross salaries in order to provide an indication of the level of net salaries. Furthermore, data are also presented on the public benefits researchers receive for these deductions. It is important to note that the data provide an indication of the remuneration package and do not offer an exact, comparable measure for researcher salaries across countries.

Finally, where available the profiles also contain information on the gross annual and hourly earnings of non-academic researchers based on Eurostat's Structure of Earnings Survey, and a summary table on salary data collected in other studies.

Further information on data collection and results of the study is available in:

\textit{IDEA Consult et al, 2013. MORE2 - Support for continued data collection and analysis concerning mobility patterns and career paths of researchers, Remuneration Cross-Country Report (WP4). European Commission, DG Research and Innovation.}
1.1 Main indicators

Source: MORE II expert survey; Spokes are normalised minimum = 0, and maximum = 100\% in case of „PhD-Stipends“ and „Salaries R1-R4“, maximum = R1 in case of „Permanent contract“, and maximum = 5 in case of „Salary rise“, „Salary at appointment“, and „Minimum salary“. Missing values are set to zero.

- 1) **Degree of autonomy**: „Salary rise“, „Salary at appointment“, and „Minimum salary“ based on question: „Please indicate the institutional level at which the following aspects of public university researchers are determined?“ Scale: (1) National, (2) Regional (state), (3) Sector/collective agreements, (4) University, (5) Individual negotiation, (0) missing value;

- 2) **Prospect of a ”permanent contract“** shows the lowest career stage (R1-R4) at which university researchers can obtain permanent contracts.

- 3) **Salaries**: „PhD Stipends“, „Salaries R1-R4“ show gross annual salaries (in PPP €) paid in the country as a percentage of the best paying country at this career stage.
## 1.2 Salaries, stipends and benefits by job positions and employment contract

Source: MORE II - Expert Survey; National currency: EUR; Annual Gross Salary: Source: 1) 2010; Statistical Office of the Republic of Slovenia; 2, 3, 4, 5) 2012; Collective Agreement, Public Sector Wage System Act, Decree on promotion to salary grades (http://www.mpju.gov.si/en/legislation_and_documents/valid_regulations/); Notes: ad 2) Contracts (lasting 3 years can be renewed 3 times; ad Stipends: Data include also Erasmus grants. The indicated stipends are for students which do not have an employment contract and include national (state) stipends or “Zois stipends” (only for excellent students) - both funded by the state - and corporate stipends paid by the potential employers or local community but subsidized by the national budget up to 50%. Stipends are available for Slovenian nationals, EU citizens and from other countries if they have residence permit. The students should not be older than 26 years, awarded any other stipend, be employed or entitled to unemployment benefits. Stipends are granted for the whole study, but student needs to prove the study success every year; PPP: Salaries and Stipends in national currency are converted into PPP US-Dollar (2011) and the resulting PPPs are converted into EURO using the currency exchange rate of Eurostat 1,3920$ = 1EURO; if the year of the salary or the stipend is not 2011, the amount was grossed up to 2011 using the unit labour costs index of the AMECO database.
